Volumen	1.6 m ³
Nettovægt	332.0 kg
Bruttovægt	352.9 kg

Miljø

Content

The fibre composition in the product is virgin fibres

Material

Virgin fibre

Virgin pulp fibres are produced out of softwood or hardwood. The process is either sulphite or sulphate delignification, meaning that e.g. lignins and resins are removed from cellulosic material.

Bleaching of fibres

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view .

The used functional chemicals are:

Wetstrength agent

Dry strength agent

Dye

Fixing agents

Fluorescent whitening agent

Glue

Softeners

The process chemicals are:

Antipitch

Protection agent

Yankee coating

Defoamer

Dispersing agents and surfactants

Tork Vaskeklud

Farve: Hvid

pH and charge control

Retention aids

Broke treatment chemicals

Drainage aid

Product safety

The product fulfils the legislative requirements for food safety.

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes

Environmental label = Ecolabel

This product is approved with EU Ecolabel

Date of issue 2013-12-10

Revision date

Production

This product is produced at Suameer mill, NL.

Suameer mill is certified according to ISO 14001 and EMAS.

Destruction

For disposal of used product please contact the local authorities.

The packaging can be used for material recovery or energy recovery
