

**NORDISK FORHANDLER AF
/
NORDIC DISTRIBUTOR OF**

Product presentation

Packaging 800 pcs.

- **Content:** 20 bags with 40 units
- **Dimensions:** 440 x 330 x 420 mm

Bag with 40 pcs.

- **Content:** 8 rolls of 5 units

Labelling

- Name and address of the manufacturing company
- Product designation in several languages
- Commercial reference, Batch and barcode
- Protective pictograms
- CE marking
- Number of units
- Single-use only
- Storage conditions
- Shelf life
- CE marking

General characteristics

Description: Shoe covers DELUXE in reinforced fabric with anti-slip polyethylene sole.

Textured surface, with elastic adjustment that allows a good adaptation to other protective elements. The material of construction, polyethylene, allows good resistance to liquid penetration and the rubber elastic makes it easy to put on and adjust. Waterproof.

One size,

Dimensions 41 cm \pm 2 cm
16 cm \pm 2 cm

Weight 9 g \pm 0.5.

Available in white (PP) and blue (CPE).

Sterilisation is possible by ethylene oxide by means of:

- Pre-treatment cycle of 16-72 h.

- Gas contact 3 h/850 mg.
- Evaporation 48 h at 40 °C.

Shelf life: 3 years

Classification:

Protective product Category I; Regulation (EU) 2016/425.

Sizes: NA.

Physical Properties

Composition: Polypropylene (PP) and Chlorinated Polyethylene (CPE)

Characteristics:

- Ambidextrous
- Protein free

- Latex free
- Free of dust and chemical accelerators

Sizes

NA

Uses and applications

In the sanitary field, protective shoe covers for work in clean medical-sanitary and food environments, for laboratory use and in general for all activities where a minimum protection against contamination of the environment is required, acting as a protective barrier against splashes.

They are also used in the **food, electronics and cleaning** industries because PE and PP do not contain latex or chemical accelerators, thus reducing skin irritation problems due to allergic causes, although they are not designed to be in direct contact with the skin, and they also offer acceptable comfort and ease of application. In the food area, these shoe covers comply

with the requirements of regulation 2016/1416 for plastic materials intended to come into contact with food, although they are not designed to come into direct contact with food except accidentally.

Storage conditions

Keep stored in a cool, dry place. Avoid excessive heat and protect from direct sun exposure or fluorescent lighting, as well as proximity to high frequency equipment.

Directives and reference standards

- **Royal Decree 1407/1992**, concerning Personal Protective Equipment.
- **Regulation (EU) 2016/425** on Personal Protective Equipment.

Management system

Management system in accordance with ISO 9001.
